Pruthvi Sagar

Software Development Lead at Brillio | Java | Angular | Spring |
Microservices
Greater Bengaluru Area

Summary

Full Stack Software Engineer with ~4 years of experience building and modernizing enterprise applications in high-scale environments. Strong expertise in Java, Spring Boot, Angular (v12+), TypeScript, Microservices, and REST APIs, with hands-on experience delivering end-to-end features across frontend and backend. Experienced in migrating legacy systems to modern architectures, designing scalable microservices, building reusable components, and optimizing application performance. Comfortable working across the full development lifecycle — from requirement analysis and technical design to implementation, integration, and production support. Focused on writing clean, maintainable code, improving system reliability, and delivering solutions aligned with business objectives in Agile environments.

Experience

Brillio
Lead Software Engineer
June 2026 - Present (4 months)
Bengaluru

Concentrix Catalyst
Software Engineer 1
July 2024 - June 2026 (2 years)
India

Client: T-Mobile | Telecommunication Domain

- > Led Angular version upgrade (v9 → v16), improving application performance and maintainability
- > Designed and optimized REST APIs using Spring Boot for high-traffic telecom applications
- > Handled production incidents independently using Splunk, ensuring minimal downtime and faster issue resolution

- > Built an AI-assisted automation framework using GitHub Copilot for the True-Up process, reducing execution time from ~1 day to ~2 hours and significantly improving operational efficiency
- > Adopted AI-driven development practices using GitHub Copilot to accelerate coding and automate unit test creation, improving developer productivity, code quality, and test coverage.
- > Contributed to refactoring legacy modules, improving code quality, maintainability, and scalability. Worked in high-ownership environments, taking responsibility for end-to-end feature delivery and production stability
- > Supported on-call operations and resolved critical production issues under tight timelines

LTIMindtree

Senior Software Engineer

July 2021 - July 2024 (3 years 1 month)

Bengaluru, Karnataka, India

Client: Unitrax Domain : BFSI

- Worked under Unitrax Transmission Program UTP, transforming Legacy Monolithic BFSI application to new Micro service based GUI using Angular and Spring Framework
- Continuously delivered Rest APIs (80+ APIs) using Spring and UI screens (50+ Screens) using Angular.
- Performed unit testing using Junit & Mockito at 3 layers (Service, Business, Controller) to ensure Api reliability. Used Karma & Jasmine to perform unit testing at the UI component level.
- I incorporated all coding standards such as design patterns, SOLID principles, SONAR violations, JACOCO code coverage, and WCAG standards to ensure the code quality is always delivered.
- Created common SHARED business rules from API and worked on the creation of a custom LIBRARY to achieve cross-module functionality by leveraging the NEXSUS repository.
- Worked closely with Business Analyst (BA) and product owner in alignment of stories and requirements.
- Created UI Design and Functional standards for the development of stories.
- Leveraged Resilience4J features for cross-module API calls to make applications resilient to failures.
- Implemented Spring AOP to modularize cross-cutting concerns such as logging, caching, security, and transaction management.

- Leveraged the Internationalization process at the UI Level,so that our application can cater to users of different language preferences.

Capgemini

Web Developer

December 2020 - April 2021 (5 months)

Education

Nitte Meenakshi Institute of Technology

Bachelor of Engineering - BE, Computer Science · (2017 - 2021)

St. Joseph's Pre-University College

Pre-University Course, PCMC · (2015 - 2017)

New Nation Academy High School

· (2005 - 2015)
